3rd (4 weeks after 2nd visit)	014 013	Consultation - Check and adjust Examination

Building a working relationship with referring physicians

Medical Specialists have repeatedly advised SomnoMed that they prefer to work with Dentists who provide feedback to them regarding treatment of their patients. They rely on feedback to ensure their patients receive effective treatment and to determine where they will refer patients in the future. Please utilise the SomnoMed Physician Referral Pad to improve inter disciplinary communication.

SomnoMed strongly recommends that you provide such feedback in order to build trust and an effective ongoing relationship.
